

Разложение многочлена на множители группировки

$$\textcircled{1} ab - 2b + 3a - 6 =$$

A screenshot of a Zoom meeting interface. The main window shows a grid of participants. In the top-left corner, there is a video feed of a woman with dark hair. To her right, there is a video feed of a man with dark hair. Below these, there are several smaller, mostly dark video feeds, indicating other participants whose cameras are off. The names of the participants are visible below their respective video feeds, though they are mostly illegible due to the low resolution and darkness. The interface includes standard Zoom controls like 'Mute', 'Unmute', and 'Video Off' buttons.
